

AHMAD KHALID BUTT

Full Stack Developer | Solutions Architect

+92-346-6611-482 • ahmedkhalidbutt@gmail.com • linkedin.com/ahmedkhalidbutt • Lahore, Pakistan

Summary

With extensive experience in software architecture and development, Ahmad Khalid Butt brings a wealth of expertise in leading and managing complex web and cloud-based projects. Currently steering a high-growth fintech company towards regional expansion, he has successfully driven significant monthly revenue. His proficiency in modern web frameworks, cloud services, and containerization technologies complements his strong leadership and problem-solving skills, ensuring the delivery of high-quality, scalable solutions.

Skills

HTML • CSS (Bootstrap, SCSS) • JavaScript • React.js (Gatsby, Next.js) • Angular • Node.js • Express.js • Nest.js • TypeScript

MySQL • MongoDB • Postgres • Python (Flask)

AWS (Amplify, Serverless, RDS) • Google Cloud Platform (GCP) • Docker • Kubernetes • CI/CD Pipelines • System Architecture • Containerization • Microservices Architecture • ETL Data Integration • Local Infrastructure Setup

Effective Communication • Team Management • Problem Solving • Mentorship and Coaching • Continuous Learning • Strategic Planning

Experience

Abhi Pvt Ltd

Lahore, Pakistan

Team Lead

2022 - Present

Guided cross-functional teams to develop and deploy intricate fintech solutions, ensuring alignment with project goals and client needs

- Managed multiple IT projects within budget constraints, ensuring adherence to scope and timely milestone delivery
- Orchestrated cloud projects, ensuring seamless deployment and optimization while aligning with project goals and client needs.
- Implemented efficient cloud infrastructure strategies at Abhi Pvt Ltd., resulting in a 30% reduction in deployment time and improved scalability
- Spearheaded the integration of third-party clients, enhancing system functionality and expanding market reach
- Developed and maintained deployment pipelines using Amplify, ensuring seamless and efficient code delivery
- Containerized interfacing microservices with Docker, increasing system reliability and deployment flexibility
- Led the setup of system architecture on AWS, leveraging cloud services to enhance reliability and scalability
- Leveraged Node.js and Express to build RESTful APIs, facilitating seamless communication between frontend and backend systems
- Implemented effective communication strategies within the team, fostering collaboration and knowledge sharing

Arbisoft

Lahore, Pakistan

Software Engineer

2021 - 2022

Driving innovation through meticulous software engineering, powering seamless digital experiences

- Executed web automation projects using TypeScript, enhancing efficiency and reducing manual efforts
- Designed and implemented test plans with TypeScript, ensuring comprehensive test coverage and product reliability
- Collaborated with cross-functional teams to define test strategies and prioritize test efforts based on project requirements and risk assessments
- Utilized Node.js libraries for various integration tasks, optimizing system interoperability and performance
- Executed web automation projects using TypeScript, resulting in a 20% reduction in manual effort and a 30% increase in workflow efficiency.
- Implemented test automation, reducing manual testing by 40% and improving software quality.
- Engaged in Agile ceremonies to align testing activities with project goals and timeline

DMechs

Lahore, Pakistan

Full Stack Developer

2020 - 2021

Empowering digital innovation as a Full Stack Developer crafting seamless web solutions for enhanced user experiences.

- Crafted optimized JavaScript solutions, driving performance and user experience enhancements across web applications
- Developed reusable components and modular codebases, accelerating development timelines and ensuring scalability
- Engineered web apps with React.js and Angular, delivering dynamic and responsive user interfaces
- Created RESTful APIs with Express, enabling seamless communication between frontend and backend systems
- Implemented backend authentication using Node.js, ensuring secure access to web applications
- Leveraged agile methodologies to manage project workflows and ensure timely delivery of milestones
- Collaborated with cross-functional teams to translate project requirements into technical solutions, fostering effective communication and collaboration

Experience

Karigar Web Solutions

Sialkot

Javascript Developer

2019 - 2020

Innovative JavaScript Developer driving efficiency and user engagement through bespoke front-end solutions and interactive web applications.

- Developed "White Falcon" front-end framework, reducing development time by 40% and streamlining project workflows
- Engineered a web-based multiplayer card game using React, enhancing user engagement and fostering collaborative gaming experiences
- Created data parsing Chrome extensions, optimizing data accessibility and usability for improved browsing efficiency
- Led React development projects for real estate appointment booking, ensuring intuitive user interfaces and seamless scheduling functionalities
- Demonstrated proficiency in JavaScript, React, and Chrome extension development, consistently delivering high-quality solutions that meet client needs
- Collaborated with cross-functional teams to translate project requirements into technical solutions, fostering effective communication and project coordination
- Adapted quickly to new technologies and frameworks, staying updated with industry trends and emerging best practices in web development

Education

University of Gujrat

Pakistan

Bachelor's Degree in Software Engineering

2015 - 2019

Strengths

Innovative Problem Solver

Navigating challenges with creativity and precision

Strong Leadership

Experienced in leading and mentoring teams, resulting in highly efficient project execution.

Effective Communicator

Fostering synergy through mutual support and shared goals
